

Lightweight pallet fork

Lightweight pallet fork for excavators in the 2–6 tonne weight classes

The lightweight pallet fork comes in two versions, one hydraulic and one mechanical and it can handle a load of 2 tonnes of TP500 which means that it is rated for 2 tonnes of load 500 mm out from the back edge of the forks. The weights are calculated at 141 kg for the mechanical and 151 kg for the hydraulic pallet fork and the standard length of the forks is 800 mm.

The hydraulic version is adapted for engcon's automatic quick hitch system EC-Oil enabling the driver to connect the pallet fork and its hydraulics automatically without stepping out of the cab. The hydraulic pallet fork with EC-Oil fits perfectly with our EC206, which later in the year will be equipped with our automatic quick coupler.

Specifications

Type	GHH1000L	GH1000L
Recommended machine weight (t)	2–6	2–6
Quick hitch standard	S40 with EC-Oil	S40
Estimated weight (kg)	151	141
Dimension (mm)	80x40x800	80x40x800
Width (mm)	1,000	1,000
Tine length (mm)	800 (1,200 also available)	800
TP500 (t)	2	2
