

Riddle bucket SKB

For all excavators in the 1.5–33 tonne weight classes

The SKB sorting bucket is designed to more easily get beneath the material intended for sorting.

It has a slightly narrower shape than the Engcon SP sorting bucket and its long base and low side panels make it easier to get beneath e.g. asphalt or other material intended for sorting.

The base ribs run along the length of the bucket, allowing material to slide easily in and out.

The SKB sorting bucket requires no hydraulics and is thus ideal for simple sorting where e.g. finer material is required for backfill or some other use. The cutters, lower side plates and ribs are made of high-strength wear bar with a hardness of up to 500 Brinell, thus guaranteeing maximum efficiency and long service life.
